MAKING A DIFFERENCE, ONE ENERGY SOLUTION AT A TIME!

Who we are?

Uniross is a B2B company that designs, manufactures and markets 'In-demand' portable energy solutions.

Our innovative products and custom solutions make portable power more reliable, energy efficient and sustainable. With over 5 decades of domain expertise, our branded products and custom solutions have helped small, medium and large businesses across the world to gain a competitive advantage and capture larger market share.

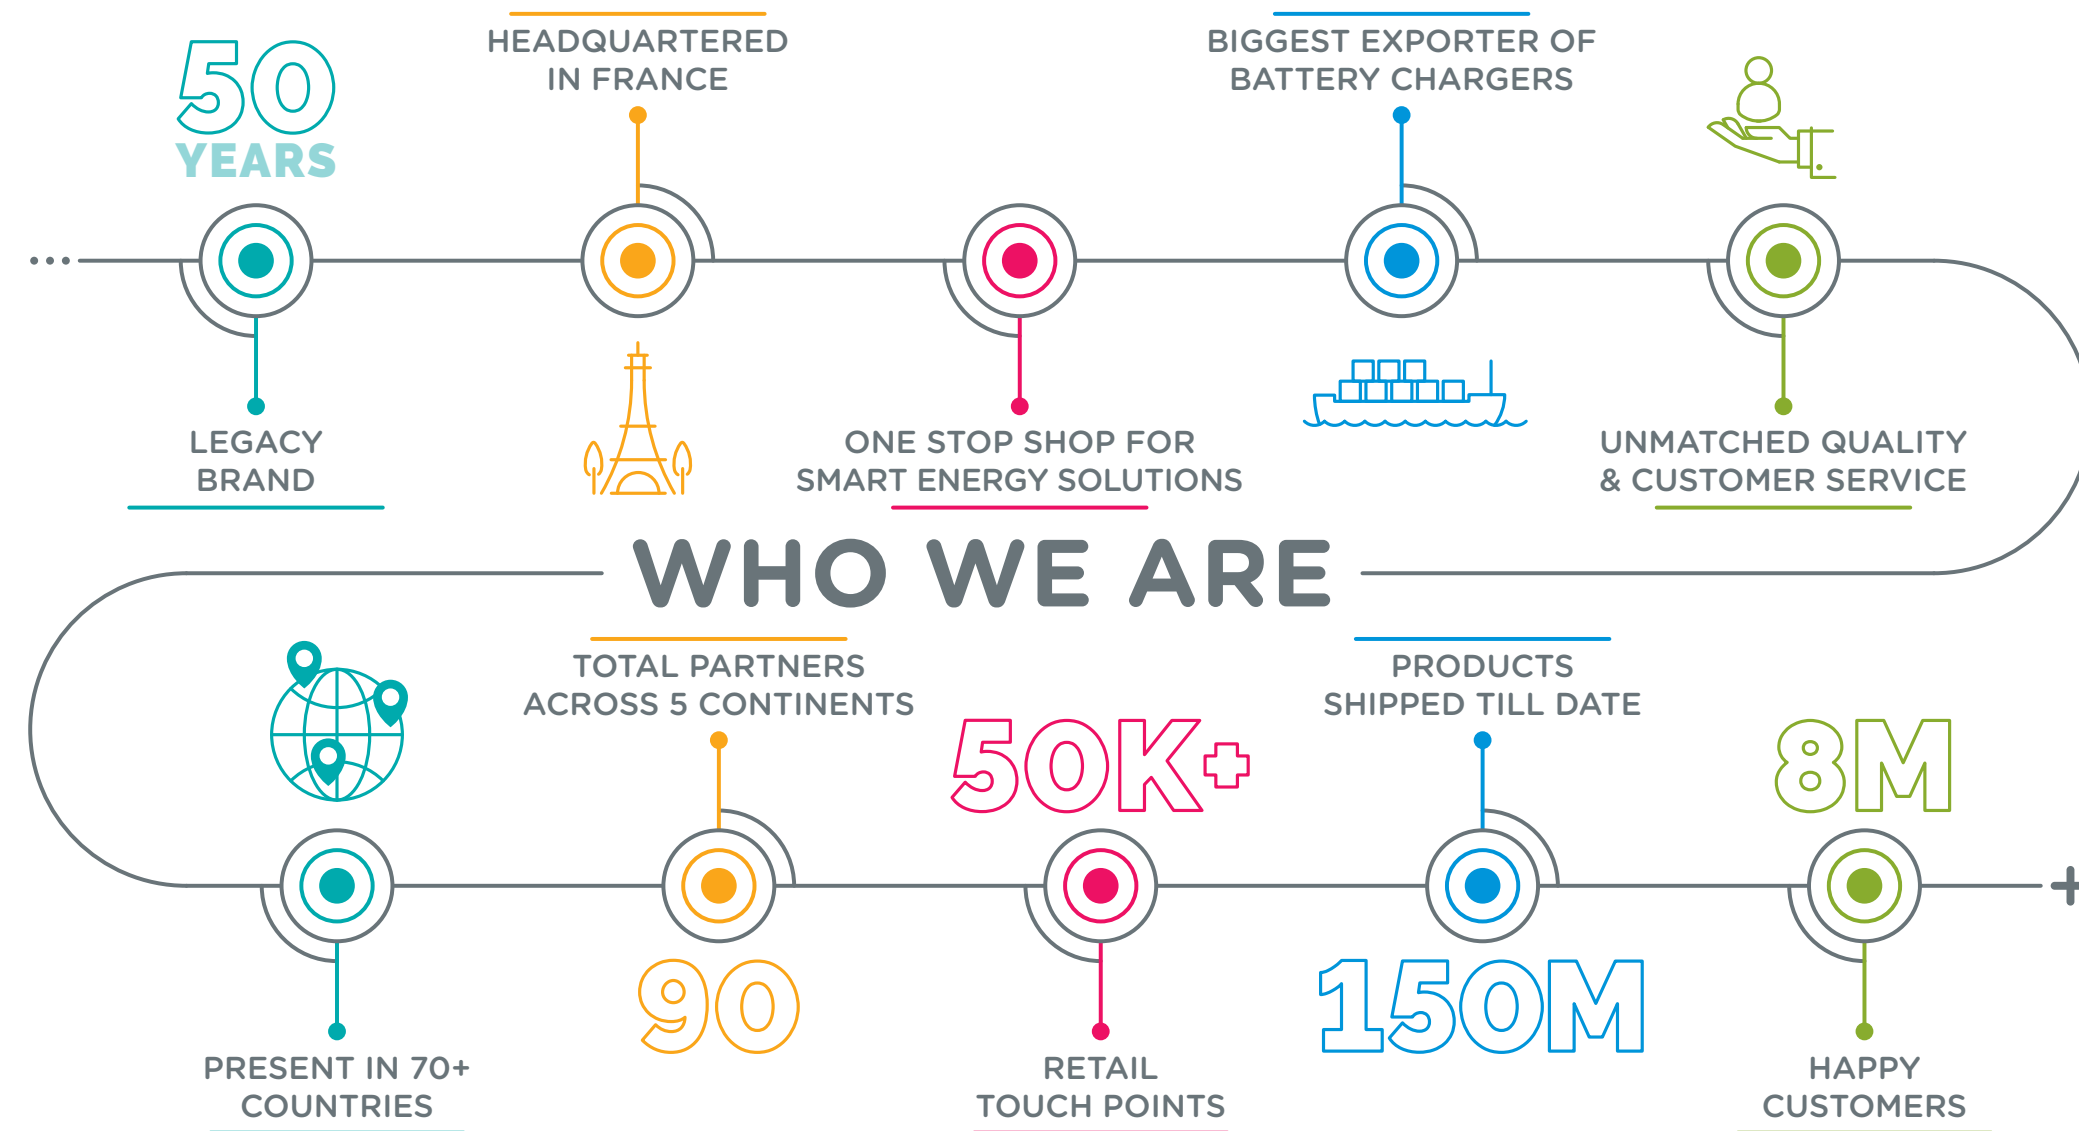

A global brand

We are a household brand synonymous with high quality, efficiency and reliability. From our humble beginnings in the United Kingdom, our brand is now headquartered in France with branches serving global partners in over 70+ countries. We have shipped over 150 million products which have been interacting with consumers via 50000+ retail and online channels. This impeccable brand reputation has helped our partners to seamlessly expand business footprint and capture greater market share in key regions.

Building new age products and solutions

At Uniross we continuously strive to keep in pace with the changing demands and expectations of the new age consumer. Our R&D team is committed in developing and improving technologies and products through effective nurturing of consumer insights and using best in class prototyping and manufacturing techniques.

Ni-MH

High capacity High performance battery for professional photography

CONSISTENT POWER OUTPUT

Uniross NiMH battery provides a uniform stream of power output throughout its working cycle and even just before its complete depletion. This gives a consistent flash performance during crucial shoots.

IMPROVED REFRESH RATE

Its superior performance output enables a faster refresh rate thereby keeping the flash ready at all times. This helps to take photos more quickly than those taken using conventional batteries.

LONGER SHOOT CYCLES

The high capacity ensures long hours of power output to camera devices allowing to continuously shoot photos for a long period of time before the need to replace the batteries.

SPECIALTY
BATTERIES

Specialty applications like medical products, emergency equipments & high performance devices undergo continuous innovation and have become more compact with times. These devices need compact, high power and long-lasting batteries to power them while providing an optimal device performance for a sustained period of time. Uniross specialty batteries covers the whole spectrum of batteries for such specialty applications which are manufactured using advanced machines and go through strict testing procedures to give high quality batteries with consistent output.

UNIROSS RANGE OF SPECIALTY BATTERIES ARE AVAILABLE IN 3 CATEGORIES

PHOTO LITHIUM

Large capacity batteries in a compact package for high performance devices

Mega power in compact dimensions

Advanced Lithium technology enables these batteries to pack more power in a slimmer footprint that compliments well with the design requirements of new age, high performance devices.

Superior performance in High Drain devices

Uniross Photo Lithium perform extremely well in high drain devices by giving a steady voltage output for 80% of their discharge cycle.

ALKALINE MICRO

Slim Alkaline batteries for low power smart devices

Optimum performance in compact size

Powered by Alkaline technology these batteries pack a healthy charge in slim proportions and provide sufficient power for a long lasting device performance.

Tested, verified & certified

With stringent internal quality parameters, Uniross batteries are tested thoroughly for no leakage, vibration resistance and extreme temperature compatibility.

HEARING AID

Dependable & long lasting power source for Hearing aid products

More power per battery

Advanced Zinc Air technology enables these batteries to pack more power in a slimmer footprint that meets all high energy requirements of modern wireless hearing aids.

Safe and reliable

Batteries use high grade stainless steel with anti-corrosion properties making these batteries extremely safe to use.

BATTERY CHARGERS

Battery chargers are an essential companion to rechargeable batteries ensuring a quick recharge and keeping them operational at all times. Chargers are environment friendly and cost effective as they use less energy and cost than manufacturing a new battery and produce significantly reduce battery waste caused by discarding single use batteries.

PROFESSIONAL CHARGERS

Uniross offers a convenient assortment of battery chargers equipped with advanced features like quick charge technology, sound indication and wrong polarity detection making them an ideal choice for professionals and consumers alike. These chargers have been designed to fit most battery sizes and varieties and come in convenient packaging options.

Biggest range of chargers

User friendly

Charges, tests, and revives batteries

Works with universal voltage configurations

ONE CHARGER FOR MULTIPLE BATTERY CONFIGURATIONS, ANYWHERE

Smart technologies and class-leading features implemented in our Professional range of chargers allows you to use them with a wide variety of 1.2 V Ni-MH, 3.2 V LiFePO4, 3.7/3.85 V Li-Ion batteries. LCD Pro 3T and Compact 3T chargers are also capable of accepting universal voltage via a wide range of electrical outlets (EU, US, UK, and AU), as well as 12 V DC input for on-the-go charging, and, thanks to their compact dimensions, easy to carry and store.

Charges Li-Ion, LiFe-PO4, and Ni-MH

High grade, shockproof, and fireproof PVC material

Sleek design with secure fit battery mechanism

packaging variations

Smart LCD Pro 3T UCX005

An intelligent charger to quickly power any device battery

An intelligent charger ideal for families and professionals that quickly powers any device battery. This charger caters to varying battery geometries used in different devices. Its intelligent design not only docks the battery securely but also provides uniform charging to all batteries. Designed and engineered using high grade, shockproof and fireproof PVC material coupled with an intuitive LCD display, results in a consistent high performance for years. It also facilitates complete discharging of a battery when needed.

Reverse polarity detection with auto switch-off mechanism

Snug-fit clamps for secure battery fit

Compatible batteries: **Li-Ion/LiFePO₄:** 10440, 14500, 14650, 16340 (R-CR123), 17500, 17670, 18350, 18500, 18650, 20700, 21700, 22650, 25500, 26500, 26650, 32650, 33600; **Ni-MH/Ni-Cd:** AA, AAA, AAAA, 2/3AA, C, D, SC

packaging variations

Smart Compact 3T LED UCX006

An intelligent charger to quickly power any device battery

This charger caters to varying battery geometries used in different devices. Its intelligent design not only docks the battery securely but also provides uniform charging to all batteries.

1.2V NiCd/Ni-MH

3.7/3.85V Li-Ion

- Car Charger and Micro USB input
- Bright blue LED Indicator
- Reverse polarity detection with auto switch-off mechanism
- Snug-fit clamps for secure battery fit

Compatible batteries: **Li-Ion:** 10440, 14500, 14650, 17500, 17670, 18350, 14430, 18650, 22650, 26500, 26650; **Ni-MH/Ni-Cd:** AA, AAA, C, D, SC

packaging variations

Smart Mini 3T UCX003

Mini yet powerful, Uber portable charger

Fully capable of handling most popular battery sizes with an unique built in functionality of a Powerbank

1.2V NiCd/Ni-MH

3.2V LiFePO₄

3.7/3.85V Li-Ion

- Bright blue LED Indicator
- Snug-fit clamps for secure battery fit
- High grade, shockproof & fireproof PVC material
- Compatible with most vape batteries

Compatible batteries: **Li-Ion/LiFePO₄:** 10440, 14500, 14650, 17500, 17670, 18350, 18500, 18650, 20700, 21700, 22650, 25500, 26500, 26650, 32650, 33600; **Ni-MH /Ni-Cd:** AA, AAA, AAAA, 2/3AA, C, D, SC

NIMH CHARGERS

Uniross introduces high performance, light weight NiMH battery chargers equipped with advanced electronic circuits ensuring rapid & safe charging for household and professional use batteries. These chargers provide audio and visual alerts along with a host of safety features to provide an optimum charging performance.
